As we understand that the Project is a step-by- step learning environment that closely simulates the class-room and Lab based learning environment into actual implementation. It is a project implementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- Practice step by step i.e. ladder approach.
- Build a larger more robust application.
- Usage of certain utilities in applications designed by user.
- Single program to unified code leading to a complete application.
- Learn implementation of concepts in a phased manner.
- Enhance skills and add value.
- Work on real life projects.
- Give a real life scenario and help to create applications more complicated and useful.
- Mentoring through email support.

We would like to send a great thank to our professor, Mr Le Thanh Nhan and others student for the addorable supports during the time in project.

Beside serveral mistakes we had made in the project, we hope to have more oppotunities to widen our knownledge in web developing world.

We also thank you so much for your infomation and the “demo” project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning any thing as much as we can to be more successful in the future.

Your Sincerely,
Team Group 03.

Synopsis

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us front-end or back-end technology but to provide us with a real life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of Semester II, as well as special subjects those are Java and PHP. These programs should be done in the Lab sessions with assistance of the faculty if required.

The website (in this project) is to bring great flavors in each dish, bringing culinary joy to everyone.

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per requirements given.

Review 01

DesignPlan: ChickenCondor	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 10/07/2023	Version 1.0	Page No: 1 of 33

Problem Definition

1. Condor is a chain of fast food restaurants under FPT Corporation - one of the largest corporations in Vietnam. During the past time, it has been ranked No. 1 in terms of "Brand Strength", granted by "FPT Management Association", and was selected as the No. 1 position in terms of brand competitiveness with the title of "Commercial Shares". mark" of the rating agency. brand value.
2. During the past time, Condor has made constant efforts to provide customers with attentive, considerate and non-research services to develop a healthy food culture. to ensure hygiene, food safety and environmental protection.
3. Based on the need outlined in the Master Project, we designed an application that will provide the following key features and functionality:
4. Design Plan: ChickenCondor Document Name: SWD Problem Definition/Form No. 01/PD/Ver1.0
5. Effective Date:10-07-2023 Version 1.0 Number of pages: 1 of 28
6. ✓ Provide membership registration function.
7. ✓ Provide product information to customers and members.
8. ✓ Provide shopping cart function so customers and members can order products.
9. ✓ Members can ensure their privacy through the Member Dashboard (MCP)
10. ✓ Receive comments from customers and members to improve service quality as well as product quality.
11. The Administrator Console (ACP) supports the management system:
12. ✓ Administrators have the ability to quickly and accurately add and update product information.

13. ✓ Admins have the ability to manage members and their feedback, comments or ratings.
14. ✓ Admin has the ability to manage the delivery progress of the order.
15. ✓ Administrator has the ability to report statistics.

The Role of User and Admin:

1. User:

- a. Can register as a member and manage personal account.
- b. Can view and buy products.
- c. Can give feedback, comment, rate about products.
- d. Can view their orders.

2. Administrator

- a. Can add / edit / deactivate products and categories.
- b. Can view customer's information or deactivate an account.
- c. Can reply the feedback or comment.
- d. Can view all orders and approve orders.
- e. Can view report statistics.

Effective Date: 10/07/2023	Version 1.0	Page No: 3 of 33

Customer Requirements Specifications

User:

input:

- Member registration data.
- Order selected products.
- Feedback about products

Process:

- Search products from database by categories, by product types.
- Process customer registration data.
- Process product's feedback.
- Process customer orders.

Output:

- Notification of successful registration / failure.
- Product information.
- Notification of successful making order order.

Effective Date: 10/07/2023	Version 1.0	Page No: 4 of 33

Webmaster:

input:

- Administrator login data.
- Product and category information to add / edit / delete.
- Member information to be search / delete.
- Order information to be search / approve.

Process:

- Add / edit / delete products.
- View information of all members.
- Change member account's status.
- View all orders.
- Update order status.

Output:

- Notification to add / edit / delete products success / failure.
- Notification to change member account's status.
- Notification to update order's status.
